Thanks For Buying A BISSELL CleanView Bagless Power Trak Plus

We're glad you purchased a BISSELL CleanView Bagless Power Trak Plus Vacuum. Everything we know about floor care went into the design and construction of this complete, high-tech home vacuuming system.

Your BISSELL CleanView Bagless Power Trak Plus is well made, and we back it with a limited comprehensive two-year warranty. We also stand behind it with a knowledgeable, dedicated Consumer Services Department, so, should you ever have a problem, you'll receive fast, considerate assistance.

My great-grandfather invented the floor sweeper in 1876. Today, BISSELL is a global leader in the design, manufacture, and service of high quality homecare products like your BISSELL CleanView Bagless Power Trak Plus.

Thanks again, from all of us at BISSELL.

Mark J. Bissell
President and Chief Executive Officer

IMPORTANT SAFETY INSTRUCTIONS

When using an electrical appliance, basic precautions should be observed, including the following:

READ ALL INSTRUCTIONS BEFORE USING YOUR UPRIGHT VACUUM.

Always connect to a properly Earthed Outlet. Unplug from outlet when not in use and before conducting maintenance or troubleshooting.

WARNING: To reduce the risk of fire, electric shock, or injury:

- Use indoors only.
- Do not leave machine when it is plugged in.
- Do not service machine when it is plugged in.
- Do not use with damaged cord or plug.
- Do not use machine if it has been dropped, damaged or dropped into water.
- Do not handle unit with wet hands.
- Do not pull or carry by cord, use cord as a handle, close door on cord, pull cord around sharp corners or edges, run appliance over cord, or expose cord to heated surfaces.
- Do not carry the appliance while in use.
- Do not unplug by pulling on cord. Unplug by grasping plug.
- Do not handle plug or appliance with wet hands.
- Do not put any object into appliance openings, use with blocked opening, or restrict air flow.
- Do not expose hair, loose clothing, fingers or body parts to openings or moving parts.
- Do not pick up hot or burning objects.
- Do not pick up flammable or combustible materials (lighter fluid, petrol, kerosene, etc.) or use in the presence of explosive liquids or vapour.
- Do not use appliance in an enclosed space filled with vapours given off by oil base paint, paint thinner, some moth proofing substances, flammable dust, or other explosive or toxic vapours.
- Not intended for use by young children or infirm persons without supervision.
- Young children should be supervised to ensure that they do not play with the appliance.

- Remove plug from electrical outlet before cleaning or maintaining the appliance.
- If the supply cord is damaged, it must be replaced by the manufacturer or its service agent in order to avoid a hazard.
- Do not pick up toxic material (chlorine bleach, ammonia, drain cleaner, petrol, etc.).
- Do not modify the Earthed plug.
- Do not allow to be used as a toy.
- Do not use for any purpose other than described in this User's Guide.
- Use only manufacturer's recommended attachments.
- Keep openings free of dust, lint, hair, etc.
- Keep appliance on a level surface.
- Turn off all controls before unplugging.
- Unplug by grasping the plug, not the cord.
- Be extra careful when cleaning stairs.
- Pay close attention when working around children.

WARNING: The Power Cord on this product contains lead, a chemical known to the State of California to cause birth defects or other reproductive harm. WASH HANDS AFTER HANDLING.

SAVE THESE INSTRUCTIONS.

THIS MODEL IS FOR HOUSEHOLD USE ONLY.

WARNING:

This appliance must be Earthed.

IMPORTANT

FOR OPERATION ON A 220/240 VOLT A.C. 50/60 Hz POWER SUPPLY ONLY.

FOR RESIDENTS OF THE UNITED KINGDOM ONLY

If your appliance is fitted with a nonrewireable BS 1363 plug it must not be used unless a 13 amp (ASTA approved to BS 1362) fuse is fitted in the carrier contained in the plug. (Spares may be obtained from your BISSELL supplier). If for any reason the plug is cut off, it must be disposed of, as it is an electric shock hazard should it be inserted into a 13 amp socket.

⚠ CAUTION:
 Do not plug in your vacuum cleaner until you are familiar with all instructions and operating procedures.

How To Use This Guide

This User's Guide has been designed to help you get the most satisfaction from your BISSELL CleanView Bagless Power Trak Plus. You'll find assembly and operating instructions, safety precautions, as well as maintenance and troubleshooting instructions. Please read this User's Guide thoroughly before assembling your vacuum cleaner.

Pay particular attention to the product diagram, assembly instructions, and part names. Locate and organize all parts before assembly. Familiarize yourself with the parts and where they fit. Following this User's Guide will greatly enhance your ability to get the most performance from your BISSELL CleanView Bagless Power Trak Plus for many years.

WARNING:

Plastic film can be dangerous. To avoid danger of suffocation, keep away from babies and children.

How To Put It Together

The only tool you'll need to assemble your vacuum cleaner is a screwdriver.

Attach Handle To Vacuum

1. Locate the vacuum Handle and remove the screw packet taped to the base of the Handle.
2. Stand the vacuum upright and slide the base of the Handle firmly into the grooves at the top of the vacuum body.
3. Check to be sure the Handle is fitted to the vacuum body. If there is a gap in front, continue to push firmly until the Handle is flush.
4. Insert the screw provided from the screw packet into the existing hole. Tighten securely with a screwdriver.

Attach Vacuum Hose and Tools

1. Position the Twist 'n Snap Hose assembly on the back of the vacuum.
2. Line up the tabs on the base of the Twist 'n Snap Hose with the corresponding notches on the hose collar as shown.
3. Turn the Twist 'n Snap Hose to the right to lock the hose into place.
4. Grasping the Quick Reach Handle, slide the end of the Hose Wand onto the Hose Wand Base. Snap the Hose into the Hose Clip.

NOTE: The Powerfoot will not operate effectively unless the Hose Wand is firmly attached.

5. Slide the Extension Wand and the Crevice Tool together into the storage clip as shown.
6. Slide the Dusting Brush/Upholstery Tool into the storage clip as shown.
7. Attach the TurboBrush by aligning the small holes near the brush roll with the tabs at the bottom of TurboBrush housing. Snap TurboBrush into place as shown.

NOTICE:

The Floor Brush will continue to rotate while you use your vacuum for above floor cleaning. To prevent carpet damage, do not lean on the vacuum or let the Powerfoot tilt forward.

CAUTION:

Before using your vacuum, make sure that the Dirt Container and Upper Tank are in locked position and that all Filters (UpperTank, Pre-Motor and Post-Motor) are in place. Do not operate your vacuum without these Filters.

How To Use Your Vacuum

Handle Positions

Press the Handle Release Pedal with your foot to place your vacuum into one of three cleaning positions.

1. Upright- For storage and above floor cleaning with tools.
2. Normal Cleaning- Press Handle Release Pedal once. Use for most household floor cleaning tasks.
3. Low Cleaning- With the vacuum in normal cleaning position, press Handle Release Pedal again. Use for reaching under low furniture such as tables, chairs or beds.

Height Adjustment

The Powerfoot/Rotating Floor Brush on your vacuum can be adjusted to clean several floor surfaces.

NOTE: For optimal cleaning performance, adjust to the lowest practical setting. If your cleaner is difficult to push, adjust to the next higher setting.

1. Place Handle in Upright Position.
2. Turn Height Adjustment knob to desired setting.
 - Lowest Setting** For bare floors.
 - Medium Settings** For short and medium pile carpets.
 - Highest Setting** For plush pile carpet.
3. Place the Handle in the normal cleaning position and the Powerfoot will adjust to the setting chosen.

NOTE: You may also adjust the setting while in the normal cleaning position.

Tip:

Before cleaning under low furniture, check area first for objects that might harm the unit or block the Vacuum Hose.

Tip:

Your vacuum features a Quick-Release Cord Wrap. To remove the Power Cord quickly and easily, rotate the Upper Cord Wrap towards floor, and slip Power Cord from Upper and Lower Cord Wraps.

Transporting Cleaner

1. To move your cleaner from room to room, put the Handle in the upright position, tilt the cleaner back on its rear wheels and push forward.
2. The cleaner can also be moved by using the Carrying Handle on the back.

NOTICE:

While vacuuming, certain carpets and low humidity conditions may generate small static discharges. The discharges are entirely harmless and are not associated in any way with the main power supply.

Clean Filter Indicator

The Clean Filter Indicator tells you when airflow in the vacuum is reduced due to dirty Filters or a clog in the hose. The Clean Filter Indicator will remain green until the airflow is reduced. At that time, it begins to change to red. When it is fully red, the airflow is significantly reduced or blocked. Follow the steps on page 10 to clean your Filters. All Filters in the vacuum should be cleaned or replaced when the Clean Filter Indicator turns red.

If the indicator remains red after all Filters have been cleaned, follow the steps on page 12 to check for and clear clogs.

Special On-Board Tools

Your CleanView Bagless Power Trak Plus is not only a powerful carpet and rug vacuum cleaner, it's also a versatile above floor vacuum cleaner when you select one of the special tools.

1. Raise Handle to Upright Position.
2. Grasp the Quick Reach Handle and lift Hose Wand to separate from suction intake opening.
3. Attach tools by firmly pushing onto Vacuum Hose or Extension Wand.

Dusting Brush/Upholstery Tool: Two types of cleaning tools in one attachment.

- Use the Dusting Brush to dust furniture, blinds, books, lamps, shelves and baseboards.
- Slide the brush off to use the Upholstery Tool on cushions, draperies and fabrics.

Crevice Tool: Use in tight narrow spaces.

Extension Wand: Use with desired attachment for a longer reach.

TurboBrush: Use rotating brush action for small areas such as stairs and upholstery.

Note: Press gently when using the TurboBrush to gain maximum cleaning. Too much pressure will cause the brush to stop rotating.

Stair Cleaning Tool (Optional Item): Use for stairs, area rugs, and other small carpeted areas. This tool can also be used for bare floors.

All items may not be included with your model. More tools are available; to order please refer to page 15.

Tip:

Hair, string and small objects can block the Vacuum Hose or Tools. Check them occasionally for obstructions.

NOTICE:

The Floor Brush will continue to rotate while you use your vacuum for above floor cleaning. To prevent carpet damage, do not lean on the vacuum or let the Powerfoot tilt forward.

CAUTION:

The Rotating Floor Brush continues to rotate while tools are in use. To reduce the risk of injury from moving parts, always move the cleaner with the Carrying Handle at the back of the cleaner. Always place vacuum cleaner on floor with Handle in Upright position when using tools. Never place your fingers under the cleaner when it is running. Never place Powerfoot on furniture or uneven surfaces. Do not place vacuum cleaner close enough to objects to pull them into rotating brush.

Power Cord Storage

When you are done using your vacuum, return it to the Upright position and store the Power Cord.

1. Turn vacuum cleaner OFF.
2. Unplug Power Cord by grasping the plug (NOT the cord) and disconnect from outlet.
3. Loop Power Cord around Cord Wraps on side of vacuum cleaner.

How To Maintain Your Vacuum

To maximize your **cleaning performance** and **extend the life** of your vacuum, it is very important that you empty your dirt container and check and clean your Filters frequently. Perform the following maintenance steps:

1. Empty the Dirt Container when the dirt reaches the "Full" line on the side.
2. Check the Upper Tank and Pre-Motor Filters at least once a month and clean or replace as needed.
3. Clean or replace the Post-Motor Filter every three to six months.

Note: More frequent Filter cleaning may be necessary if you are vacuuming new carpet, fine dust, or have allergy concerns. Follow the instructions on the following pages to perform these simple maintenance steps.

WARNING:

To reduce the risk of electric shock, turn Power Switch OFF and disconnect plug from electrical outlet before performing maintenance or troubleshooting checks.

Tip:

For maximum cleaning performance, check and clean or replace all Filters as suggested.

Empty Dirt Container

The Dirt Container needs to be emptied when the dirt reaches the "Full" line on the side of the Container.

1. Unplug cleaner from electrical outlet.
2. Slide the Lock 'n Seal Lever to the "Unlock" position.
3. Grasp handle and pull the Dirt Container straight out to remove from vacuum.
4. Empty dirt into garbage container.
5. Put the Dirt Container back in the vacuum and slide the lever to the "Lock" position.

Note: The Dirt Container may be washed in warm water with a mild detergent. Make sure it is completely dry before using again.

Cleaning The Upper Tank & Filter

Use only BISSELL Style 7 Replacement Upper Tank Filters in your CleanView Bagless Power Trak Plus.

1. Unplug the cleaner from electrical outlet.
2. The Upper Tank Filter can be reached by removing the Dirt Container, reaching underneath the Upper Tank and turning the rim of the Filter Frame to unlock. Pull straight down to remove. Brush the dirt off the Louvers and Upper Tank Filter.
3. The foam Upper Tank Filter may be removed and hand washed in cold water with mild detergent. Rinse well then air dry thoroughly before replacing.
4. The Upper Tank and Louvers may also be wiped clean with a damp cloth.

Note: For easier access, the entire Upper Tank may be removed by turning the knob on the back of the cleaner to unlock and pulling the entire tank straight out.

Cleaning The Pre-Motor and Post-Motor Filter

Use only BISSELL Style 7 Replacement Pre-Motor Filters and Style 7 Post-Motor Filters in your CleanView Bagless Power Trak Plus.

1. Unplug the cleaner from electrical outlet.
2. The Pre-Motor Filter protects the motor from dirt particles. It is located in the slide out tray underneath the Dirt Container. If the Filter becomes dirty, pull out the tray, lift out the Filter and clean.
3. The Post-Motor Filter assists in the filtration process to return clean air to the room. It is located behind the door on the side of the cleaner. If the Filter becomes dirty, open the door, remove the Filter and clean.

Note: This model comes with a white, pleated HEPA Media Filter. This Filter is not washable and must be replaced. A standard washable Filter may be purchased as an optional item. Please refer to page 15 for ordering.

4. The standard Filters may be hand washed in cold water with mild detergent. Rinse well and air dry thoroughly before replacing.

Check Rotating Floor Brush and Drive Belt

You should check your vacuum cleaner's Rotating Floor Brush and Drive Belt regularly for wear or damage. You should also clean the brush and brush ends of strings, hair, and carpet fibers. These can wrap around the brush and hamper its ability to effectively clean your carpet. Also remove any debris that has accumulated under the brush cover.

1. Unplug cleaner from electrical outlet.
2. Place handle in Low position and turn vacuum cleaner over so bottom side is up.
3. Remove the five screws as shown with a Screwdriver. Lift the Brush Cover off.
4. Grasp Rotating Floor Brush at both ends and lift.
5. Clean strings, hair and other debris from Rotating Floor Brush, paying particular attention to brush ends.
6. Clean strings, hair and other debris from Motor Pulley and Drive Belt areas.
7. Check Drive Belt carefully for wear, cuts or stressed areas.
8. Check Air Passageway for obstructions. Remove debris from this area.

Replace Drive Belt

Use only BISSELL Style 7 Replacement Belts in your CleanView Bagless Power Trak Plus.

1. Unplug cleaner from electrical outlet.
2. With Rotating Floor Brush removed from vacuum cleaner (Steps 1-4 of check Rotating Floor Brush and Drive Belt), grasp old Drive Belt and remove from Motor Pulley. Discard old Drive Belt.
3. Place new Drive Belt over Motor Pulley and stretch other end over Rotating Floor Brush in the space between the bristles.
4. Place ends of Rotating Floor Brush down into slots on sides as shown.
5. Turn Rotating Floor Brush by hand several times in the direction of Motor Pulley. If properly installed, Drive Belt will center itself on Rotating Brush crown.
6. Reposition Brush Cover and screw or snap back into place. Check to be sure all screws are secure.

Wide Power Trak foot

Air Passageway

Maintaining TurboBrush

The TurboBrush should be checked regularly for clogs or debris wrapping around the brush roll.

1. Unplug vacuum from electrical outlet.
2. If a clog is present or debris is visible, unscrew the two screws on the back of the TurboBrush to remove the faceplate and clear any obstructions.
3. To clean debris from the brush roll, remove the screw located by the brush roll with a Phillips head screwdriver. Lift the belt cover. Remove the brush roll from the drive belt and clean debris.
4. Reposition the drive belt on the brush roll. Place ends of brush roll in slots on sides as shown. Reposition belt cover and secure with one screw. Reposition faceplate and secure with two screws.

Clearing Clogs

Low suction or poor pickup may be due to a clog in the vacuum cleaner. If you notice a change in the sound of the motor or a reduction in the spinning action, check for clogs.

1. Unplug cleaner from electrical outlet.
2. Empty Dirt Container.
3. Check Upper Tank for build up or clogs.
4. Remove the Upper Tank and check the suction inlet for a clog.
5. Grasp the Quick Reach Handle and lift Hose Wand to separate from the suction opening. Check for a clog in the Base and the Wand.
6. Remove the Twist 'n Snap Hose from the vacuum by turning to the left. Check for clog in the suction Inlet and hose. Straighten the hose and unclog with a long, narrow object.
7. Remove the screw attaching the Hose Wand Base to the vacuum. Straighten the Hose Wand Base and unclog with long, narrow object.
8. If the clog persists, follow the instructions for Checking the Rotating Floor Brush on page 11 and inspect the Air Passageway for obstructions.

Troubleshooting

Vacuum cleaner won't run

Possible Causes

- ❶ Power cord not plugged in

Vacuum cleaner or Tools won't pick up dirt

Possible Causes

- ❶ Incorrect Height Adjustment
- ❷ Hose not attached to suction opening
- ❸ Twist 'n Snap Hose not securely attached
- ❹ Crack or hole in Hose
- ❺ Broken or worn Drive Belt
- ❻ Rotating Floor Brush bristles worn
- ❼ Rotating Floor Brush jammed
- ❽ Clog in vacuum
- ❾ Dirt Container full
- ❿ Dirt Container or Upper Tank not installed properly
- ⓫ Filters are dirty

Vacuum cleaner is difficult to push

Possible Causes

- ❶ Incorrect Height Adjustment

Visible dirt escaping from cleaner

Possible Causes

- ❶ Dirt Container full
- ❷ Filters missing or installed incorrectly
- ❸ Dirt Container installed incorrectly

WARNING:

To reduce the risk of injury from moving parts and/ or electrical shock, turn Power Switch OFF and disconnect plug from electrical outlet before performing troubleshooting checks.

Remedies

- ❶ Check electrical plug

Remedies

- ❶ Adjust Powerfoot to correct height setting
- ❷ Grasp Quick Reach Handle and firmly push Hose Wand onto the suction opening
- ❸ Make sure Twist 'n Snap Hose is snapped into locked position
- ❹ Check Hose and replace if needed
- ❺ Replace Drive Belt, see page 11
- ❻ Replace brush
- ❼ Remove brush and clean debris from brush ends
- ❽ Clear clog, see page 12
- ❾ Empty Dirt Container
- ❿ Position correctly and lock in place
- ⓫ Check and clean Upper Tank, Pre-Motor and Post-Motor Filters

Remedies

- ❶ Adjust Powerfoot to correct height setting

Remedies

- ❶ Empty Dirt Container
- ❷ Check Upper Tank, Pre-Motor and Post-Motor Filters for correct installation
- ❸ Pull out and re-insert Dirt Container correctly
